WORLD DIABETES DAY-2022

A REPORT

PROGRAM : WORLD DIABETES DAY-2022

DATE OF THE EVENT : 14th November 2022

TIME : 2.30 to 4.00 PM

VENUE : Seminar Hall, Mallige College of Pharmacy

PARTICIPANTS : Students and Staff

FACULTY CO-ORDINATOR: Mrs. JAMUNA T R

OBJECTIVE:

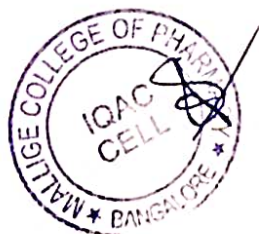

- To raise awareness of diabetes as a global public health issue and
- What needs to be done, collectively and individually, for better prevention, diagnosis and management of the condition.

Background: Globally, an estimated 422 million adults were living with diabetes in 2014, compared to 108 million in 1980. The global prevalence of diabetes has nearly doubled since 1980, rising from 4.7% to 8.5% in the adult population. This reflects an increase in associated risk factors such as being overweight or obese. Over the past decade, diabetes prevalence has risen faster in low and middle-income countries than in high-income countries.

Diabetes is a major cause of blindness, kidney failure, heart attack, stroke and lower limb amputation. Healthy diet, physical activity and avoiding tobacco use can prevent or delay type 2 diabetes. In addition diabetes can be treated and its consequences avoided or delayed with medication, regular screening and treatment for complications.

In 2007 General Assembly adopted resolution 61/225 designating 14 November as World Diabetes Day. The document recognized “the urgent need to pursue multilateral efforts to promote and improve human health, and provide access to treatment and health-care education.”

The resolution also encouraged Member States to develop national policies for the prevention, treatment and care of diabetes in line with the sustainable development of their health-care systems.

Access to diabetes care

The theme for World Diabetes Day 2021-23 is access to diabetes care.

100 years after the discovery of insulin, millions of people with diabetes around the world cannot access the care they need. People with diabetes require ongoing care and support to manage their condition and avoid complications.

The centenary of the discovery of insulin presents a unique opportunity to bring about meaningful change for the more than 460 million people living with diabetes and the millions more at risk. United, the global diabetes community has the numbers, the influence and the determination to bring about meaningful change. We need to take on the challenge.

Diabetes: key facts

A healthy diet, regular physical activity, maintaining a normal body weight and avoiding tobacco use are ways to prevent or delay the onset of type 2 diabetes. Diabetes can be treated and its consequences avoided or delayed with diet, physical activity, medication and regular screening and treatment for complications. International days and weeks are occasions to educate the public on issues of concern, to mobilize political will and resources to address global problems, and to celebrate and reinforce achievements of humanity. The existence of international days predates the establishment of the United Nations, but the UN has embraced them as a powerful advocacy tool. We also mark other UN observances.

Program: On the Eve of World Diabetes Day on 14th November 2022, Mallige College of Pharmacy conducted Seminar and delivered a Guest lecture on the theme "Education to Protect Tomorrow" at Mallige Auditorium.

On this occasion, Mrs. Jamuna T R, Department of Pharmacy Practice welcome the gathering. Dr. Rajendra S.V. Vice-Principal Mallige College of Pharmacy, Dr. Manikanta B.D. and Mr. Hanumantharayappa delivered speech on the theme. Dr. Shailesh Yadav, HOD, Department of Pharmacy Practice proposed vote of thanks.

The event was organized under the banner of NSS unit by the cooperation and guidance of Naveen Kumar S, NSS officer & other team members along with Pharmacy Practice Department.

The Session was informative and Around 100 first year B. Pharma & Pharm.D students and teaching staffs were actively participated in this program.

NSS REPORT ON WORLD HYPERTENSION DAY

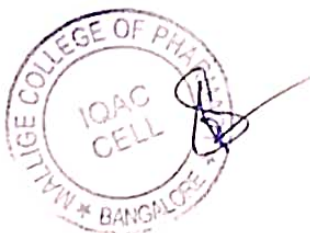

WORLD HYPERTENSION DAY – May 13th 2022

Measure Your Blood Pressure Accurately, Control It, Live Longer!

The theme of WHD for 2022 is Measure 'Your Blood Pressure Accurately, Control It, Live Longer'. It focuses on combating low awareness rates worldwide, especially in low to middle-income areas, and accurate blood pressure measurement methods.

Hypertension or high blood pressure occurs when the blood pressure rises to an unhealthy level. The disease is very common and develops over a course of years. Narrow arteries cause more resistance and increase blood pressure. This force can cause damage to blood vessels, and lead to heart attack, brain stroke, kidney damage, or nerve damage.

The NSS Team of Mallige College of Pharmacy organized and celebrated "World Hypertension Day" to educate and bring about awareness on health. The event was organized and arranged exhibition by NSS team of Mallige College of Pharmacy, Bengaluru with a team of NSS Officer Mr. Naveen Kumar and other team members. The students and teachers voluntarily measure their blood pressure with our beloved Chairman of Dr. Sreeram Chairman of Mallige College of Pharmacy and Dr. Raghuram Member of governing council Mallige College of Pharmacy.
